

PRESSURE SAFE LLC.

Certificate of Analysis

Microbiological testing is done using the 3M Molecular Detection System platform. This system is validated and certified as a Performance Tested Method by the AOAC research institute as an effective method for the detection of E. Coli 0157 (including H7), Salmonella, and Listeria in food.

Products are tested as a composite of a day's freeze dry production. E. Coli and L.mono results are per a 25g sample from the composite. Salmonella results are per two individually pulled 375g samples from the composite.

Moisture analysis is done via METTLER TOLEDO HB43.

Product Code	Batch #	Exp. Date	Test Date	E.coli 157:57:00	Salmonella	L.mono
CNCHIXBAR	1	07/29/2019	12/9/2015	NEGATIVE	NEGATIVE	NEGATIVE
CNCHIXBAR	3	07/29/2019	12/9/2015	NEGATIVE	NEGATIVE	NEGATIVE
CNCHIXBAR	5	07/29/2019	12/9/2015	NEGATIVE	NEGATIVE	NEGATIVE
CNCHIXNUG	7	07/29/2019	12/9/2015	NEGATIVE	NEGATIVE	NEGATIVE
CNCHIXNUG	8	07/29/2019	12/9/2015	NEGATIVE	NEGATIVE	NEGATIVE
